Professional Summary

Site Reliability Engineer with 15+ years of experience, I automate infrastructure using DevOps CI/CD pipelines leveraging scripting tools like PowerShell, Python, Ansible, GitHub Actions, Containers etc. I build monitoring and alerting systems using tools like Python, PowerShell, Flask, Prometheus and Grafana for both On-Prem and Cloud platform (AWS & Azure).

Skills

Databases: SQLServer, PostgreSQL, SQLite, RDS, Azure SQL, Managed Instance, Aurora

Programming Languages: 🐍 SQL, 📜 PowerShell, 🐍 Python, 📄 JavaScript, 📄 HTML / 📄 CSS, 📄 Shell Scripting

Tools and Frameworks: Git, Linux, Ansible, Flask, Django, GitHub Actions, VS Code, Grafana, Prometheus, KVM Virtualization, Container, Podman, Docker, Ubuntu, RHEL, PowerShell DSC, Infrastructure as Code (IaC)

Cloud Platforms: AWS, Azure

High Availability & Disaster Recovery: Clustering, Availability Groups, Mirroring, Log Shipping, Replication, Disk Stripping, RAID, Multi Subnet Setup

Languages: English (proficient), Hindi (native)

Certifications

- | | |
|--|----------|
| • Microsoft Certified Professional - Database Querying | Oct 2013 |
| • Microsoft Certified Professional - Database Administration | Dec 2013 |
| • BrentOzarUnlimited Mastering SQLServer | Nov 2022 |
| • SQLSkills Blackbelt Professional | Jun 2023 |

Experience

Principal Solution Architect - SQL Server Tessell **02 2026 - Present**

- Added enhancements to support Change Data Capture & transactional Replication
- Added Monitoring feature for Data & Log file growth
- Designed CentOS-2-RHEL Migration automation using Python & Ansible for PostgreSQL

Senior Site Reliability Engineer (DevOps) AngelOne **02 2022 - 02 2026**

- Developed DB AI Agent using Ollama (LLM) and LangChain for Performce Monitoring & Troubleshooting
- Automated multi datacenter HA & Standalone PostgreSQL setup using Ansible
- Automated disk, connectivity, patroni health, and backup alerts for PostgreSQL servers using python
- Saved 80 hours/week SRE effort with single click Github Action based PostgreSQL Cluster deployment & Configuration using Ansible Playbook.
- Baselined all windows & linux servers using Prometheus and Grafana
- Created Github Repo based baselining of servers to ease monitoring and baselining using Prometheus and Grafana
- Automated common database teams activities like installation, configuration, monitoring and alerting using PowerShell, Flask, Python, TSQL, Grafana, and PagerDuty for On-Prem and Cloud Managed Instances

Database Reliability Engineer Arcesium **05 2020 - 02 2022**

- Resolved 100s of incidents by moving 38 TB AG databases with PowerShell.
- Automated/Upgraded 30 Critical SQLClusters/AGs in 12 hours avoiding week long downtime.
- Improved database relibility with automated ScriptOut of entire SQLServer Instances for Disaster Recovery.
- Built automations to prevent common issues like tempdbSaver, LogSaver etc.

Database Administrator TiVo **02 2018 - 05 2020**

- Saved 40+ hours by automating SQLServer deployment and configuration using PowerShell.
- Reduced 80% transactional replication issues with latency infra.
- Reduced 80% performance incidents by building Delta Index Defragmentation automation for replicated & HADR databases.

Senior SQL DBA United Health Group **10 2016 - 02 2018**

- Saved \$1 million/year via DB Space Capacity Automation.
- Improved 50% performance issues with reduced VLDBs maintenance time.

Technical Lead Ericsson Global **06 2015 - 10 2016**

- 3x Performance Improvement via advanced query optimization like Recursive CTE and Table Partitioning.
- Lead 18+ developers for best practices and guidelines.

SQL DBA Developer

TATA Consultancy Services

03 2011 - 06 2015

- Moved 250+ large tables with each having billions of records using SSIS in 45 hours.
- Built data warehouse ETL pipelines using Pentaho & Kettle for high volume Liquor Retail stores.
- Saved 20+ hours/week by Automating core DBA tasks using dynamic SQL.

Education

Bachelor of Engineering in Electronics & Communication Engineering

07 2006 - 06 2010

Rustamji Institute of Technology

Gwalior, Madhya Pradesh

Awards and Honors

Tech Titan, AngelOne for 10x Performance Optimization on Prod SQLServer.

2022

Sapphire, United Health Group for Innovation and automations.

2017

Projects

SQLMonitor: Open source Enterprise grade SQLServer monitoring tool

01 2021 - Present

- Built using TSQL, PowerShell, Python, and Grafana.
- Successfully monitoring 500+ SQLServers across environments.
- Observability alerts to Slack, PagerDuty and Email
- Inbuilt auto action to Clear & Resolve

AI Agent: AI Agent to help application users troubleshoot database performance issues interactively through portal & Slack

10 2025 - Present

- Built using Python, LangChain, Ollama, and SQLMonitor
- Successfully handling developers/application users in Database Performance tuning

HadrSync: PowerShell module that synchronizes all objects across Replicas in Availability Groups

01 2021 - Present

- Ensures zero sync issues during failovers/Drs.
- Detects & synchronizes even delta changes like changes in passwords, definition etc.

Availability

Notice Period: 30 Days

Relocation: Open to Relocation

Remote: Open to remote opportunities

FINAL NOTE

I have problem-solving mindset and love designing efficient database systems and solving complex performance challenges in collaboration with various tech teams. I help organisations build robust, fully automated infrastructure with PowerShell, Python and Ansible.
