Professional Summary

Site Reliability Engineer with 15+ years of experience, I automate infrastructure using DevOps CI/CD pipelines leveraging scripting tools like PowerShell, Python, Ansible, GitHub Actions, Containers etc. I build monitoring and alerting systems using tools like Python, PowerShell, Flask, Prometheus and Grafana for both On-Prem and Cloud platform (AWS & Azure).

Core Competencies

- AWS | Ansible | RDS | Python
- SQL | PostgreSQL | Monitoring | CI/CD
- Infrastructure as Code | Automation | Kubernetes | Terraform
- EC2 | Cloud Infrastructure | On-Call | Capacity Planning
- Customer-Facing

Skills

- **Databases:** SQLServer, PostgreSQL, SQLite, RDS, Azure SQL, Managed Instance, Aurora
- **Programming Languages:** SQL, PowerShell, Python, JavaScript, HTML / CSS, Shell Scripting
- **Tools and Frameworks:** Git, Linux, Ansible, Flask, Django, GitHub Actions, VS Code, Grafana, Prometheus, KVM Virtualization, Container, Podman, Docker, Ubuntu, RHEL, PowerShell DSC, Infrastructure as Code (IaC)
- **Cloud Platforms:** AWS, Azure
- **High Availability & Disaster Recovery:** Clustering, Availability Groups, Mirroring, Log Shipping, Replication, Disk Stripping, RAID, Multi Subnet Setup
- **Languages:** English (proficient), Hindi (native)

Certifications

- Microsoft Certified Professional - Database Querying (October 2013)
- Microsoft Certified Professional - Database Administration (December 2013)
- BrentOzarUnlimited Mastering SQLServer (November 2022)
- SQLSkills Blackbelt Professional (June 2023)

Experience

Tessell *February 2026 – September 2026*

Principal Solution Architect - SQL Server

- Designed CentOS-2-RHEL Migration automation using Python & Ansible for PostgreSQL
- Wrote SAGA workflows using Kubernetes & dockerized environment to build Tessell Database As a Service platform on AWS and Azure.
- Built DBaaS for deploying SQLServer on AWS EC2 & Azure VM
- Wrote Python-based SAGA workload to build Tessell DBaaS on Cloud Infrastructure
- Worked with customers to debug production bugs & implement fixes during 24x7 on-call support
- Added Monitoring feature for Data & Log file growth using SQLExporter, Prometheus & Victoria Metrics
- Added enhancements to support Change Data Capture & transactional Replication

AngelOne *February 2022 – February 2026*

Senior Site Reliability Engineer (DevOps)

- Automated AWS RDS/Aurora PostgreSQL database deployment & maintenance using Terraform
- Built SQLMonitor monitoring tool with dashboards that helped in capacity planning & estimate required space for next couple of years based on past growth
- Automated multi datacenter HA & Standalone PostgreSQL setup using Ansible
- Automated disk, connectivity, patroni health, and backup alerts for PostgreSQL servers using Python
- Saved 80 hours/week SRE effort with single click GitHub Action based PostgreSQL Cluster deployment & Configuration using Ansible Playbook.
- Automated common database teams activities like installation, configuration, monitoring and alerting using PowerShell, Flask, Python, TSQL, Grafana, and PagerDuty for On-Prem and Cloud Managed Instances
- Developed DB AI Agent using Ollama (LLM) and LangChain for Performance Monitoring & Troubleshooting
- Created GitHub Repo based baselining of servers to ease monitoring and baselining using Prometheus and Grafana
- Baselined all Windows & Linux servers using Prometheus and Grafana

Arcesium *May 2020 – February 2022*
Database Reliability Engineer

- Resolved 100s of incidents by moving 38 TB AG databases with PowerShell.
- Automated/Upgraded 30 Critical SQLClusters/AGs in 12 hours avoiding week long downtime.
- Improved database reliability with automated ScriptOut of entire SQLServer Instances for Disaster Recovery.
- Built automations to prevent common issues like tempdbSaver, LogSaver etc.

TiVo *February 2018 – May 2020*
Database Administrator

- Reduced 80% performance incidents by building Delta Index Defragmentation automation for replicated & HADR databases.
- Saved 40+ hours by automating SQLServer deployment and configuration using PowerShell.
- Reduced 80% transactional replication issues with latency infra.

United Health Group *October 2016 – February 2018*
Senior SQL DBA

- Fixed multiple critical customer-facing performance & deployment issues by directly interacting with them
- Saved $1 million/year via DB Space Capacity Automation.
- Improved 50% performance issues with reduced VLDBs maintenance time.

Ericsson Global *June 2015 – October 2016*
Technical Lead

- 3x Performance Improvement via advanced query optimization like Recursive CTE and Table Partitioning.
- Led 18+ developers for best practices and guidelines.

TATA Consultancy Services *March 2011 – June 2015*
SQL DBA Developer

- Saved 20+ hours/week by Automating core DBA tasks using dynamic SQL.
- Moved 250+ large tables with each having billions of records using SSIS in 45 hours.
- Built data warehouse ETL pipelines using Pentaho & Kettle for high volume Liquor Retail stores.

Projects

SQLMonitor *January 2021 – Present*
Open source Enterprise grade SQLServer monitoring tool (GitHub)

- Built using TSQL, PowerShell, Python, and Grafana.
- Successfully monitoring 500+ SQLServers across environments.
- Observability alerts to Slack, PagerDuty and Email
- Inbuilt auto action to Clear & Resolve

AI Agent *October 2025 – Present*
AI Agent to help application users troubleshoot database performance issues interactively through portal & Slack (GitHub)

- Built using Python, LangChain, Ollama, and SQLMonitor
- Successfully handling developers/application users in Database Performance tuning

HadrSync *January 2021 – Present*
PowerShell module that synchronizes all objects across Replicas in Availability Groups (GitHub)

- Ensures zero sync issues during failovers/DRs.
- Detects & synchronizes even delta changes like changes in passwords, definition etc.

Education

Bachelor of Engineering in Electronics & Communication Engineering *July 2006 – June 2010*
RustamJi Institute of Technology, Gwalior, Madhya Pradesh

Awards and Honors

- **Tech Titan**, AngelOne for 10x Performance Optimization on Prod SQLServer (2022)
- **Sapphire**, United Health Group for Innovation and automations (2017)
